## LENTEN APPEAL 2023

### BRICKS FOR LIFE

Inspired by one man's faith filled request, the development project Bricks for Life has created incredible foundational services for the people and community of Northern Ethiopia – from grain mills, water tanks, irrigation, feminine hygiene access and even a soap making business.

Proceeds from the 2023 Lenten Appeal will go towards:

- The purchase of seed and fertiliser to be planted in time for the growing season
- The construction and maintenance of irrigation canals to bring water to remote village locations

**\$15K GOAL**

## LENTEN APPEAL 2023

### SCHOOL HEATING PROJECT

All students deserve an environment to learn in that is safe, healthy and physically suited to help them thrive. Many classrooms around the world do not have adequate heating or cooling systems to achieve this.

Your Lenten Appeal donation will go towards making safe and healthy classrooms a reality for Saviour's School in Zarqa, Jordan.

- 12 new AC units for 11 classrooms and 1 multipurpose room
- Each classroom unit is approximately \$800 USD and the larger multipurpose hall unit is approximately \$1000 USD.

**\$15K GOAL**

## LENTEN APPEAL 2023

### MUD BRICK PROJECT

When cyclones strike, homes in Fiji are the first to fall. Mud Bricks are an innovative solution to create resilient, cyclone-proof housing.

Your \$2 donation will literally build cyclone resistant houses for climate resilient communities – buy a brick to build a future!

- Production of 8000 bricks to construct a two bedroom compressed earth home
- Improvements to working and site conditions
- Wages and salaries to help scale production and employ local builders and labourers

**\$15K GOAL**

## LENTEN APPEAL 2023

### AMLAKU YAREGAL

From an early age, Amlaku valued education – so much so that when he was 12 he ran away from home to find it. He lived on the streets and did odd jobs pay for food and schooling.

While working as a tour guide, Amlaku met Ric. It was here that he made a faith filled request – "Please sir, I want to go to university".

And he did. Graduating with a qualification in agriculture, Amlaku applied his entrepreneurial drive and practical skill to transform his home village of Baregota.

Grain mills. Irrigation. Better planting methods. The changes are nothing short of remarkable. Now, Amlaku wants to do the same thing for other villages – and you can help him.

**Help Amlaku do it again.**

## LENTEN APPEAL 2023

### BUY A BRICK!

Compressed earth bricks are a cheap and sustainable method to build climate resistant houses. It takes about 8000 bricks to build one two bedroom house.

It averages about \$2NZD to produce one brick, which means your donation will literally be building build cyclone resistant houses for climate resilient communities!

Organise your community or parish to buy a brick (or multiple)! You could host a fundraiser, movie night, raffle or bake sale. Whatever it is, you'll be practically helping the people of Fiji to become even more resilient in the face of growing climate instability.

**Buy a brick, build a future.**
