

PRAY THE NEWS

Sustained drought combined with ongoing civil conflict has created deep food insecurity and social disruption for the people of Ethiopia.

The ancient land of Ethiopia is huge - at 1,112,000 sq kms and a population of 129 million, it's bigger than Spain & France combined.

Compounding new conflicts in the north are the effects of a severe drought in the south.

Millions face acute food insecurity. The increasing rate of inflation and harsh weather conditions continue to add to the list of challenges the country faces.

TODAY, WE PRAY THE NEWS FOR ETHIOPIA:

Prayer points:

- For an end to the ongoing civil war in the north, and for reconciliation between all parties, including Government, that works for the benefit of all Ethiopians
- For the funding and distribution of aid that is so desperately needed to reach the millions of people whose lives have been disrupted over the past 4 years
- For relief from the drought in the south and for good harvests and the rebuilding of animal stocks.
