

PRAY THE NEWS

Russia's actions at the UN have highlighted its diplomatic isolation and ongoing defiance in international relations.

During the Summit of the Future at the UN in late September, Russia strongly opposed the adoption of the Pact for the Future, a reform initiative aimed at addressing modern global challenges.

Despite Russia's vocal opposition, the pact was adopted by consensus, marking a significant diplomatic defeat for Russia and its allies. Russia's increasing defiance at the UN reflects its broader geopolitical strategy of challenging Western dominance within multilateral organisations.

Russia's confrontational stance, especially regarding the Pact for the Future, shows its resistance to reform efforts and international consensus,

However, these efforts have largely backfired, isolating Russia diplomatically and reinforcing global opposition to its policies, especially regarding Ukraine.

TODAY, WE PRAY THE NEWS FOR RUSSIA AND THE UN:

- We pray for peace among nations: Lord, guide global leaders to seek peaceful resolutions in all conflicts and promote cooperation over division.
- We pray for unity in diplomacy: May world leaders work together with wisdom and integrity, fostering dialogue that leads to justice and understanding.
- We pray for strengthened cooperation: God, inspire nations to collaborate on solutions that uplift humanity, ensuring the well-being of all people through shared responsibility and action.
